

**Catalog # 10-1601**

**17-PAAG**

17-(Propargylamino)-17-desmethoxygeldanamycin

Lot # S103106

Semi-synthetic analog of geldanamycin which possesses an acetylenic side chain for coupling to other probes, fluorophores and bioactive molecules such as steroids via click chemistry.<sup>1</sup> Chemical modifications at C17 are well known not to interfere with binding of geldanamycin to HSP90 client proteins.<sup>2-4</sup>

**PHYSICAL DATA**

Molecular Weight:	583.67
Molecular Formula:	C <sub>31</sub> H <sub>41</sub> N <sub>3</sub> O <sub>8</sub>
Purity:	98% by TLC
	NMR: (Conforms)
Solubility:	Soluble in DMSO (up to at least 50 mg/ml) or in Ethanol (up to 5 mg/ml)
Physical Description:	Violet solid
Storage and Stability:	Store as supplied desiccated at -20°C for up to 1 year from the date of purchase. Solutions in DMSO or ethanol may be stored at -20°C for up to 3 months.
