1-Methyl-3,4-bis(indol-3-yl)maleimide

Bisindolylmaleimide V; BIM V

Lot # X106907

This bis indolylmaleimide derivative is a potent inhibitor of the mitogen-stimulated protein kinase p70 (S6K) acting independently of its upstream activator mTOR.<sup>1</sup> Does not inhibit PKC (at concentrations <100 µM) and therefore may be used as a negative control for bisindolylmaleimide PKC inhibitors<sup>2</sup> such as GF 109203X<sup>3</sup> and other structurally related inhibitors<sup>4</sup>.
