

Catalog # 10-2990

MCC-950

CAS# 256373-96-3

N-[[[(1,2,3,5,6,7-Hexahydro-s-indacen-4-yl)amino]carbonyl]-4-(1-hydroxy-1-methylethyl)-2-furansulfonamide sodium salt
CRID3; CP-456773 sodium salt

Lot # X106933

MCC-950 was originally found to act as a cytokine release inhibitory drug (CRID), arresting activated monocytes and preventing activation of caspase-1¹. Discovered to be a novel inhibitor of the NLRP3 and AIM2 inflammasomes². Blocks canonical and noncanonical NLRP3 activation at nanomolar concentrations³. Inhibits interleukin 1 β (IL-1 β) secretion *in vivo* and attenuates the severity of experimental autoimmune encephalomyelitis (an MS disease model)³. Disrupts the interaction between AIM2 and ASC in a reconstituted cell-free inflammasome⁴. A valuable new tool for exploring the pathophysiology of NLRP3.

PHYSICAL DATA

Molecular Weight:	426.46
Molecular Formula:	C ₂₀ H ₂₃ N ₂ O ₅ S • Na
Purity:	98% by HPLC
	NMR: (Conforms)
Solubility:	DMSO (up to 40 mg/ml), or Water (up to 30 mg/ml)
Physical Description:	White solid
Storage and Stability:	Store as supplied, desiccated at -20°C for up to 2 years from the date of purchase. Solutions in DMSO or distilled water may be stored at -20°C for up to 1 month.

Materials provided by Focus Biomolecules are for laboratory research use only and are not intended for human or veterinary applications.
