Lot # X107541

A potent and selective TRPC5 blocker. Suppresses severe proteinuria and prevents podocyte loss in a transgenic rat model of focal segmental glomerulosclerosis. It also provided therapeutic benefit in a rat model of hypertensive proteinuric kidney disease. The use of this selective tool compound provided a mechanistic rationale for targeting TRPC5 channels in progressive chronic kidney diseases and paves the way for the discovery of new therapeutics. Active *in vivo*.
