

Catalog # 10-4004

KY-226

CAS# 1621673-53-7

4-(Biphenyl-4-ylmethylsulfanylmethyl)-N-(hexane-1-sulfonyl)benzamide

Lot # FBA6126

KY-226 is a selective allosteric protein tyrosine phosphatase 1B (PTP1B) inhibitor ($IC_{50} = 250$ nM) with no activity at PPAR γ .¹ It significantly reduced plasma glucose, triglyceride, and A1c levels without weight gain in db/db mice.² It has been suggested that KY-226's anti-diabetic effects occur *via* enhancements in insulin signaling and anti-obesity effects *via* leptin signaling enhancements.² KY-226 has also been shown to protect neurons from cerebral ischemia.³ This effect is mediated by restoration of tight junction proteins *via* activation of the Akt/FoxO1 pathway.⁴

PHYSICAL DATA

Molecular Weight:	481.67
Molecular Formula:	C ₂₇ H ₃₁ NO ₃ S ₂
Purity:	>98% by TLC
	NMR: (Conforms)
Solubility:	DMSO (>25 mg/ml)
Physical Description:	Off-white solid
Storage and Stability:	Store as supplied at room temperature for up to 1 year from the date of purchase. Solutions in DMSO may be stored at -20°C for up to 3 months.

Materials provided by Focus Biomolecules are for laboratory research use only and are not intended for human or veterinary applications.
