

**Catalog # 10-4251**

**Quinacrine hydrochloride**

CAS# 69-05-6

6-Chloro-9-(4-diethylamino-1-methylbutyl)amino-2-methoxyacridine dihydrochloride

Lot # FBS1079

Quinacrine is an antiprotozoan drug used for malaria and giardiasis and has recently been investigated in treating lupus, as an anticancer agent, inflammation, and as a female sterilization agent.<sup>1</sup> It has been found to have synergistic effects with vorinostat in the treatment of T-cell acute lymphoblastic leukemia via mitophagy blockage and an increase in ROS.<sup>2</sup> Quinacrine displayed antitumor effects an intestinal cancer mouse model and HCT116 p53<sup>-/-</sup> xenografts *via* reduction in Chk1/2 expression and cell death induction in the G<sub>2</sub>-M phase.<sup>3</sup> It promotes autophagic cell death in ovarian cancer cells via downregulation of p62/SQSTM1.<sup>4</sup> Quinacrine is also an inhibitor of phospholipase A<sub>2</sub>.<sup>5</sup>

**PHYSICAL DATA**

Molecular Weight:	472.88
Molecular Formula:	C <sub>23</sub> H <sub>30</sub> ClN <sub>3</sub> O·2HCl
Purity:	>98% by HPLC
	NMR: (Conforms)
Solubility:	Water (>25 mg/mL), DMSO (>10 mg/mL)
Physical Description:	Yellow solid
Storage and Stability:	Store as supplied at -20°C for up to 1 year from the date of purchase. Solutions in DMSO may be stored at -20°C for up to 1 month. Make solutions in water fresh daily.
