

Catalog # 10-4537

MDL29,951

CAS# 130798-51-5

3-(2-Carboxy-4,6-dichloroindol-3-yl)propionic acid

Lot # JKM1247

MDL29,951 is a new, highly specific, small molecule activator of GPR17¹ that has been shown to be active in intact cells¹. The ability to specifically activate GPR17 allows for the study of the exact role GPR17 plays in the maturation of oligodendrocytes and may lead to a therapeutic strategy to promote myelin repair. Antagonist for the strychnine-insensitive glycine binding site of the NMDA receptor (IC₅₀ = 170 nM).²

PHYSICAL DATA

Molecular Weight:	302.11
Molecular Formula:	C ₁₂ H ₉ Cl ₂ NO ₄
Purity:	>98% by TLC(10% MeOH/methylene chloride + 0.5% HOAc; Rf = 0.15) NMR: (Conforms)
Solubility:	DMSO (> 25 mg/ml)
Physical Description:	White solid
Storage and Stability:	Store as supplied at room temperature for up to 2 years from the date of purchase. Solutions in DMSO or ethanol may be stored at -20°C for up to 3 months.
