

Catalog # 10-4560

CT-2584

CAS# 166981-13-1 (free base)

1-(11-Dodecylamino-10-hydroxyundecyl)-3,7-dimethylxanthine methane sulfonate

Lot # FBA2087

CT-2584 is a cytotoxic agent that alters phospholipid biosynthesis via inhibition of CTP:choline-phosphate cytidyltransferase causing an increase in phosphatidylinositol and decreasing levels of phosphatidylcholine.¹ The altered phospholipid metabolism caused by CT-2584 results in a loss of lamellar structure and membrane integrity (especially in mitochondria and endoplasmic reticulum). CT-2584 was active against a wide range of tumor cell lines including multi-drug resistant lines.²

PHYSICAL DATA

Molecular Weight:	629.90
Molecular Formula:	C ₃₀ H ₅₅ N ₅ O ₃ ·CH ₃ SO ₃ H
Purity:	>98% by TLC
	NMR: (Conforms)
Solubility:	Soluble in DMSO
Physical Description:	White solid
Storage and Stability:	Store as supplied at -20°C for up to 1 year from the date of purchase.

Materials provided by Focus Biomolecules are for laboratory research use only and are not intended for human or veterinary applications.
