

Catalog # 10-4565

TTFA

CAS# 326-91-0

Thenoyltrifluoroacetone; 4,4,4-Trifluoro-1-(2-thienyl)-1,3-butanedione

Lot # FBS2057

TTFA blocks the respiratory chain complex II causing inhibition of mitochondrial respiration. Respiratory chain complex II inhibition is caused via binding of TTFA to two ubiquinone binding sites, Qp and Qd.¹ Inhibition of Complex II by TFA has been shown to cause a delay in overall cell cycle progression leading to oxidative stress.^{2,3} TTFA also was found to inhibit porcine liver carboxylesterase (IC₅₀ = 0.54 μM).⁴

PHYSICAL DATA

Molecular Weight:	222.18
Molecular Formula:	C ₈ H ₅ F ₃ O ₂ S
Purity:	>98%
	NMR: (Conforms)
Solubility:	Soluble in DMSO (>25 mg/ml) and ethanol (>25 mg/mL)
Physical Description:	Pale yellow solid
Storage and Stability:	Store as supplied at -20°C for up to 1 year from the date of purchase. Store solutions in DMSO or ethanol at -20°C for up to 1 month.

Materials provided by Focus Biomolecules are for laboratory research use only and are not intended for human or veterinary applications.
