

Catalog #10-4604

SHP099

CAS# 1801747-42-4

6-(4-Amino-4-methylpiperidin-1-yl)-3-(2,3-dichlorophenyl)pyrazin-2-amine dihydrochloride

Lot # FBA4034

SHP099 is a potent ($IC_{50} = 71$ nM) and selective allosteric inhibitor of SHP2. SHP2 is a non-receptor tyrosine phosphatase that regulates cell survival and proliferation through activating the RAS-ERK pathway. It also mediates programmed cell death 1 (PD-1) and T-lymphocyte attenuator (BTLA) immune checkpoint pathways. Treatment with SHP099, in combination with ceritinib, halts growth of ALK-inhibitor resistant non-small-cell lung cancer cells.³ Thus, reduction of SHP2 activity is a potential important cancer therapy target. It showed no activity against a panel of 21 other human phosphatases and 66 kinases.

PHYSICAL DATA

Molecular Weight:	425.18
Molecular Formula:	C ₁₆ H ₁₉ Cl ₂ N ₅ ·2HCl
Purity:	>98% (HPLC)
	NMR: (Conforms)
Solubility:	DMSO (5 mg/mL) and water (>20 mg/mL)
Physical Description:	Yellow solid
Storage and Stability:	Store as supplied at -20°C for up to 1 year from the date of purchase. Solutions in DMSO or distilled water may be stored at -20°C for up to 3 months.

Materials provided by Focus Biomolecules are for laboratory research use only and are not intended for human or veterinary applications.
