

Catalog # 10-4796

SGC-GAK-1

CAS# 2226517-76-4

6-Bromo-N-(3,4,5-trimethoxyphenyl)quinoline-4-amine

Lot # FBA6163

SGC-GAK-1 is a highly potent and selective inhibitor of cyclin G associated kinase (GAK), a member of the numb-associated kinase (NAK) family involved in membrane trafficking and sorting of proteins and is required for the maintenance of centrosome maturation and progression through mitosis. $K_D = 1.9$ nM with >50-fold selectivity against a panel of 400 kinases. It also displayed affinity for RIPK2 ($K_D = 110$ nM) and ADCK3 ($K_D = 190$ nM). SGC-GAK-1 displayed potent cellular activity in HEK293T cells ($IC_{50} = 120$ nM) and showed strong growth inhibition in the prostate cancer cell lines LNCaP ($IC_{50} = 0.65$ μ M) and 22Rv1 ($IC_{50} = 0.17$ μ M).

PHYSICAL DATA

Molecular Weight:	389.25
Molecular Formula:	C ₁₈ H ₁₇ BrN ₂ O ₃
Purity:	>99% by HPLC
	NMR: (Conforms)
Solubility:	DMSO (>25 mg/mL); ethanol (10mg/mL)
Physical Description:	Pale yellow solid
Storage and Stability:	Store as supplied desiccated at -20°C for up to 1 year from the date of purchase. Solutions in DMSO or ethanol may be stored at -20°C for up to 2 months.

Materials provided by Focus Biomolecules are for laboratory research use only and are not intended for human or veterinary applications.
